## COURSE DESCRIPTION

This course will challenge clinicians to look at familiar things through new lenses and will enhance clinical problem solving skills through case analysis. New therapists as well as seasoned therapists will improve their effectiveness in treating children with neurological deficits from infancy through young adulthood. Videotaped treatment sessions will cover topics from spasticity to hypotonia and athetosis to ataxia. Group discussions will allow critical analysis of treatment techniques as well as discussion regarding setting realistic and achievable goals for each patient shown. The information shared in this course is intended to add to the participant's existing knowledge base to continue the learning of clinical strategies and the overall understanding of patients who present with movement deficits.

## COURSE OBJECTIVES

At the completion of this course, you will be able to:

1. Define treatment techniques for use with children who have neurological impairment including how to problem solve what to do when.
2. Develop treatment strategies and goals for a variety of different children.
3. Analyze which treatment strategies will work with different types of neurological impairment.
4. Understand how to use treatment strategies to enhance the variety of treatment skills you use and improve your problem solving for treating children with neurological impairment.
5. Identify and describe movement strategies different children use for stability, mobility, postural security and independence.
6. Identify which muscles may need to be lengthened or strengthened or facilitated to work with other muscles.

## TESTIMONIALS

Comments from previous courses:

*"This seminar was excellent and applies in some way to every single child on my caseload."*

*"This was the most informative course that I have attended. The treatment techniques and educational material presented will make translation of information to practice as easy as possible."*

*"The workshop was appropriately comprehensive yet concise. Barbara was energetic and brought her deep knowledge and experience into every discussion."*

*"Barbara is clear, well-organized, articulate, honest, and knowledgeable."*

3:45-4:30	General treatment strategies

## FACULTY

**Barbara Hypes**, is a dynamic and sought after instructor, a Physical Therapist trained in both pediatric Neuro-Developmental treatment and baby treatment. She has been treating children since 1981 and teaching continuing education seminars since 1985. She has a thriving private practice and consults on challenging cases across the country. She currently teaches courses for therapists, teachers and parents throughout the United States and Canada. Topics for teaching currently focus on treatments with the ball, treating the child with hypotonia and treatment strategies for children who have neurological impairments.
